

Society Management Platform

User Onboarding & Role Flow (Final)

Document Purpose > This document describes the **final, clean onboarding and role flow** for a **multi-society SaaS platform**.

It is designed to be:

-  Client-acceptable
 -  Developer-friendly
 -  Scalable for future subscriptions
 -  Safe for a learning-stage product
-

Platform Ownership Model

Global Platform Owner

- **You (Platform Creator)**
 - **Owns:**
 - Source code
 - Infrastructure
 - Pricing & subscriptions
 - Feature flags
 - Invisible to end clients
 - No involvement in day-to-day society governance
-

Client Access Types (Signup Options)

Users signing up on the platform can choose **one of the following roles**:

1. **SocietyAdmin** – Single society management
2. **Organization Owner** – Multiple society management (subscription-based)

Note: One **Organization Owner** may be granted **free lifetime access** as a founding client.

High-Level Signup Flow

User visits platform

SIGN UP

Select Account Type

- ① SocietyAdmin (Single Society)
- ② Organization Owner (Multi Society)

Flow 1 – SocietyAdmin (Single Society)

Best for:

- Individual societies
- Small or medium apartments
- Cost-sensitive clients

Flow Diagram

SocietyAdmin Selected

Create Society
(Name, Address, Blocks, Units)

SocietyAdmin Account Created

Assign Governing Roles

- Chairman
- Secretary
- Treasurer

Capabilities

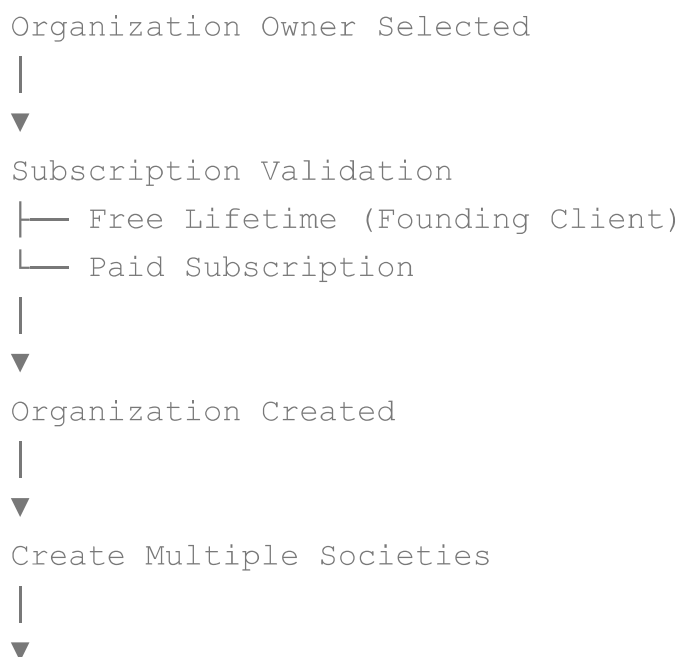

- Manages **one society only**
- Full control within that society
- Cannot create additional societies
- Upgrade available to Organization Owner

Flow 2 – Organization Owner (Multi-Society)

Best for:

- Builders
- Property managers
- Large housing groups
- Enterprise clients

Flow Diagram

For Each Society:

└─ Assign SocietyAdmin

|

Society Governance Setup

(Chairman, Secretary, Treasurer, Committee)

|

Members → Tenants → Visitors

Capabilities

- Manages **multiple societies**
 - Creates and controls SocietyAdmins
 - Views organization-level reports
 - No access to other organizations
 - No access to platform backend or pricing
-

Society-Level Role Hierarchy

SocietyAdmin

|

└─ Chairman

└─ Secretary

| └─ Manager

| └─ Employee

└─ Treasurer

└─ Committee

|

└─ Member

└─ Tenant

└─ Visitor

Role Summary

- **Chairman / Secretary / Treasurer** → Elected governing body
- **Manager / Employee** → Operations & execution
- **Member** → Flat owner with voting rights
- **Tenant** → Resident without ownership rights

- **Visitor** → Temporary access only
-

Access & Security Principles

- One organization **cannot see another**
 - Society data is strictly isolated
 - Least-privilege access enforced
 - All critical actions are auditable
 - Feature access controlled via flags
-

Subscription Logic (Simple & Flexible)

Account Type	Societies	Billing
SocietyAdmin	1	Free / Low tier
Organization Owner	Multiple	Subscription
Founding Org Owner	Multiple	Free (Lifetime)

Monetization can be **disabled during learning** and enabled later without refactoring.

Why This Design Works

- ✓ Matches real-world governance
 - ✓ Clear ownership boundaries
 - ✓ No terminology conflicts
 - ✓ Scales from 1 society to 1000+
 - ✓ Suitable for learning + production
-

Final Verdict

- Architecture is **clean and future-ready**
- Clients will **understand and accept** it
- Safe to build while learning
- Monetization is Optional
